

Pregnancy Confirmation Form ~ Lexington

We recommend having pregnancy ultrasounds performed at or near the 15th day (twins can be observed at this point), the 28th day (a heartbeat can be detected, and the vet can check for twins if a 15 day ultrasound was not performed), the 65th day, and if in doubt, a palpation later on into the pregnancy (usually prior to beginning the 5/7/9 month Pneuma-Bort shots.) However, all of these pregnancy checks are not mandatory, and we only require one pregnancy ultrasound, between the 27th and 70th day, to confirm pregnancy in accordance with the Breeding Contract.

This is intended to verify that the mare _____ (mare name)
_____ (description/color) has checked

- in foal (Mare is _____ days pregnant. (27 days minimum, 70 days maximum))
 not in foal

by a federally accredited veterinarian on _____ 20____ (date).

Name of Veterinarian:

Address & Telephone # of Veterinarian:

Signature of Federally Accredited Veterinarian:

Signature of Mare Owner:

**** This Pregnancy Confirmation form, with original signatures, must be returned to Gigha Steinman within 15 days of examination by a licensed veterinarian, in agreement with the Breeding Contract ****
