

# Pregnancy Confirmation Form

We recommend having pregnancy ultrasounds performed at or near the 15<sup>th</sup> day (twins can be observed at this point), the 28<sup>th</sup> day (a heartbeat can be detected, and the vet can check for twins if a 15 day ultrasound was not performed), the 65<sup>th</sup> day, and if in doubt, a palpation later on into the pregnancy (usually prior to beginning the 5/7/9 month Pneuma-Bort shots.) However, all of these pregnancy checks are not mandatory, and we only require one pregnancy ultrasound, between the 27<sup>th</sup> and 70<sup>th</sup> day, to confirm pregnancy in accordance with the Breeding Contract.

This is intended to verify that the mare \_\_\_\_\_ (mare name)  
\_\_\_\_\_ (description/color) has checked

- in foal (Mare is \_\_\_\_\_ days pregnant. (27 days minimum, 70 days maximum))  
 not in foal

by a federally accredited veterinarian on \_\_\_\_\_ 20\_\_\_\_ (date).

Name of Veterinarian:
